LIST OF CONTENTS

NUMBER 1

M. SEGEV — 1 Two-group diffusion theory based on separation of variables

N. F. TSAGAS, I. KAPPOS and G. ANDREOU — 17 Benchmark data for γ-rays emitted by a ^{24}Na source, penetrating graphite, Al, steel and Pb shields

T. D. BEYNON and B. S. SIM — 27 Modelling of the $^{9}Be(n,2n)$ double-differential cross section

Technical Notes

R. D. M. GARCIA — 45 On computing multigroup transfer matrices for hydrogen

Y. RONEN and M. J. LEIBSON — 51 On the "anomality" of $^{238}UO_2 + PuO_2$-H_2O lattices

55 Corrigendum

I Software Survey Section: MathType—a new tool for performing mathematical typesetting on the Apple Macintosh Computer, contributed by Paul Topping

V Patents Section

VII Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 2

S. A. EL WAKIL, H. M. MACHALI, E. A. SAIED and M. A. MADKOUR — 57 The operational method for the space-energy slowing down problem

R. INDIRA — 67 Study of biased Monte-Carlo schemes employing weight-moments equation formulation

D. E. DJAFRI — 75 Effects of anharmonicity on the Doppler broadening of neutron capture resonances

H. VAN DAM — 85 Neutron kinetics of a pumped gaseous-core reactor

Technical Notes

S. KIMHY and A. GALPERIN — 95 Simple model of thermal-hydraulic feedback for the neutronic analysis of PWR cores

M. M. R. WILLIAMS — 101 A simple method for calculating the linear extrapolation distance at the surface of a black body

107 Current Papers in Nuclear Energy

111 Press Release from the NRPB

I Software Survey Section: SLOWS—determination of the collision density for neutron slowing down in an infinite medium with constant cross sections, contributed by B. D. Ganapol

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 3

S. GANESAN, V. GOPALAKRISHNAN, M. M. RAMANADHAN and D. E. CULLEN — 113 Verification of the accuracy of Doppler broadened, self-shielded multigroup cross sections for fast power reactor applications

YOUNG HO PARK and KUN JAI LEE — 141 An analytical approach to the population balance equation for radioactive aerosols

J. JANCZYSZYN, G. DOMANSKA, W. POHORECKI, L. LOSKA and F. PACH — 155 Precise measurement of the integral cross section for the reaction $^{24}Mg(n, p)^{24}Na$ between 13.5 and 18.0 MeV

Technical Note
S. SIMONS and D. R. SIMPSON — 161 The removal rate for aerosol particles due to the combined effects of diffusion and sedimentation

163 Book Reviews

165 Press Release from the NRPB

I Software Survey Section: ChemText—a chemical word processor, contributed by Lise M. Dumont; and GRANT TRACKER™—a bookkeeping program contributed by Kendric C. Smith

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 4

Editorial
M. M. R. WILLIAMS — i *Annals of Nuclear Energy*, its origins and its publisher—Robert Maxwell

K. N. GRIMM and D. MENEGHETTI — 167 Reactivity-induced time-dependencies of EBR-II linear and non-linear feedbacks

D. P. HODGKINSON and P. R. MAUL 175 1-D modelling of radionuclide migration through permeable and fractured rock for arbitrary length decay chains using numerical inversion of Laplace transforms

E. M. RODRIGUEZ VENTURA, M. M. R. WILLIAMS and J. WOOD 191 Solutions of the diffusion equation in cones and wedges

H. AFARIDEH, K. RANDLE and S. A. DURRANI 201 An investigation of energy and emission probabilities of tritons and α-particles in the spontaneous fission of ^{252}Cf

Technical Note

H. P. RAGHAV 209 Computation of transmission probabilities for annular cylindrical geometry

215 Book Review

217 Press Release from the NRPB

III Software Survey Section

VI Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 5

H. R. HWANG and T. J. DOWNAR 219 Optimal space-time fuel distribution in a 1-D numerical core model

K. KOBAYASHI 235 An acceleration method of the iteration calculation using the Padé approximation in the spherical harmonics method

R. T. ACKROYD and M. M. NANNEH 241 Upper and lower bounds for disadvantage factors as a test of an algorithm used in a synthesis method

R. INDIRA 261 Analytical study of leakage estimators in Monte-Carlo simulation of radiation transport

Letter to the Editors

I. PÁZSIT 271 Remark on the Henry factorization of neutron noise spectra

I Software Survey Section

V Patents Section

VII Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 6

R. SANCHIS ARNAL, G. VERDÚ MARTÍN and L. MUÑOZ-COBO GONZÁLEZ — 275 Detector point of view of reactor internal vibrations under Gaussian coloured random forces—the problem of fitting neutron noise experimental data

W. ROTHENSTEIN, C. R. E. DE OLIVEIRA and N. BRANDMAN — 293 Accurate resonance absorption calculations including 2-D effects and their representation in multigroup lattice physics codes

V. KUMAR and S. V. G. MENON — 317 Discrete ordinates scheme for quadrilateral meshes

Technical Note
A. YA. TEMKIN — 323 Effect of ^{238}U on ^{232}Th–^{235}U cycle in heavy-water reactors

Letter to the Editors
A. GANDINI — 327 On the perturbation method for burnup and shuffling analysis

329 Current Papers in Nuclear Energy

331 Information from the NRPB

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 7

I. PÁZSIT — 333 Control-rod models and vibration induced noise

C. MARCH-LEUBA and J. MARCH-LEUBA — 347 Separation of spatial effects in frequency-domain subcriticality measurements

D. C. SAHNI — 357 New diffusion-like solutions of one-speed transport equations in spherical geometry

M. WAGNER, G. WINKLER, H. VONACH and G. PETŐ — 363 Measurement of the cross section for the reaction $^{93}Nb(n,n')\ ^{93m}Nb$ at 2.8 MeV

375 Book Review

377 Current Papers in Nuclear Energy

379 Announcement

I Software Survey Section

V Patents Section

VII Guidelines for the Preparation of Typescripts by Direct Reproduction

NUMBER 8

K. KOBAYASHI, Y. FUJITA and I. KIMURA — 381 Measurement of resonance parameters of ^{232}Th and their integral check through the resonance integral

M. FEIZ and A. F. ROHACH — 389 Development of a Legendre polynomial nodal model for the multigroup transport theory P_N approximation

R. T. ACKROYD and W. E. WILSON — 397 Composite finite element solutions for neutron transport

J. W. MEADOWS — 421 The fission cross sections of ^{230}Th, ^{232}Th, ^{233}U, ^{234}U, ^{236}U, ^{238}U, ^{237}Np, ^{239}Pu and ^{242}Pu relative to ^{235}U at 14.74 MeV neutron energy

Technical Note

F. C. DA SILVA and Z. D. THOMÉ — 431 Depletion calculations with static generalized perturbation theory

435 Book Review

437 Press Releases from the NRPB

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 9

T. H. J. J. VAN DER HAGEN and J. E. HOOGENBOOM — 439 Fast measurements of the in-core coolant velocity in a BWR by neutron noise analysis

S SIMONS and D. R. SIMPSON — 449 A generalized trial solution method for solving the aerosol equation

R. NICKS, G. PERLINI and H. RIEF — 457 Fission neutron penetration in iron and sodium—I. Activation measurements

N. C. GARISTO and F. GARISTO — 471 The effect of model dimensionality on source terms for the assessment of used fuel disposal

Technical Note
J. D. LEWINS — 477 An explicit second integral for an elementary model of a reactor accident

479 Book Review

481 Current Papers in Nuclear Energy

485 Press Release from the NRPB

I Software Survey Section

V Patents Section

VII Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 10/11

H. KONNO, H. SONEDA, T. TANAKA and K. HAYASHI — 487 Analysis of pressure fluctuations in the Borssele nuclear reactor based on bispectrum and higher order moments—statistical analysis of an intermittent burst

F. INANC and A. F. ROHACH — 501 A nodal solution of the multigroup neutron transport equation using spherical harmonics

Technical Notes
Y. RONEN — 511 The inverse uncertainty analysis

A. S. MAKARIOUS, I. I. BASHTER and A. M. I. KANY — 513 Radiative capture γ-rays arising from iron fibre additions to ilmenite limonite concrete shields

I. SZALÓKI, S. SZEGEDI, M. VÁRADI, CS. M. BUCZKÓ, A. PÁZSIT and F. DIVÓS — 523 An improved method for the determination of the neutron fluence in fission power reactors based on the $^{93}Nb(n,n')^{93m}Nb$ reaction

527 Book Reviews

529 Current Papers in Nuclear Energy

531 Announcement

I Software Survey Section

V Patents Section

VII Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 12

V. COLOMBO, S. E. CORNO and P. RAVETTO — 533 A new application of space asymptotic transport theory

S. L. SCHOFIELD — 543 A maximum principle for the first-order Boltzmann equation, incorporating a potential treatment of voids

J. E. HOOGENBOOM and A. R. VAN DER SLUIJS — 553 Neutron source strength determination for on-line reactivity measurements

T. B. RYVES, P. KOLKOWSKI and S. M. JUDGE — 561 Cobalt cross sections for 14 MeV neutrons

Technical Note
S. J. D. D'ALESSIO and A. A. HARMS — 567 Comet induced nuclear fusion in the atmosphere

571 Current Papers in Nuclear Energy

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction
